Democratising Community Action

Citizens taking power of data

Question Formulation Technique (QFT) - PART 1

Rules for Producing Questions

- Ask as many questions as you can
- Do not stop to discuss, judge or answer the questions
- Write down every question exactly as it is stated
- Change any statement into a question

What is Your Focus?

Democratising Community Action

Citizens taking power of data

ASKING QUESTIONS

1. Follow the Rules for Producing Questions.
2. Number your questions.

DATA:IN PLACE RQI

Democratising Community Action

Citizens taking power of data

IMPROVE YOUR QUESTIONS

Categorize questions as Closed or Open-ended:

- Closed-ended questions can be answered with "yes" or "no" or with one word.
- Open-ended questions require an explanation and cannot be answered with "yes" or "no" or with one word.

Find closed-ended questions.
Mark them with a "C."
The other questions must be open-ended.
Mark them with an "O."

Discuss the value of each type of question:

Advantages & disadvantages of closed-ended questions
Advantages & disadvantages of open-ended questions

Citizens taking power of data

PRIORITISE YOUR QUESTIONS

Choose your three most important questions:

Q1

Q2

Q3

Why did you choose these three as the most important?
What are the numbers of your priority questions?

Creating a Challenge - PART 2

What data and other resources (technology, people, skills) are needed?

What do we already know?
What data do we need to answer these questions:

- What is out there/what exists?
- How to get access to it?
- Do we need to collect something ourselves?

How do turn the data into something useful?

Using pen and paper please try to sketch the visual representation of the output – what would you expect the data to look like?

Making data actionable!

How can we use the sensemaking and the visualisations to take action?
